FULL STACK WEB DEVELOPER

ABOUT ME

I am a detail-oriented Full Stack Web Developer Intern with a strong interest in building modern, secure, and user-friendly web applications. I have practical experience working with frontend and backend technologies, API integration, database management, authentication, and responsive user interface development. I enjoy solving technical problems, learning new technologies, and turning ideas into useful digital solutions.

PROFESSIONAL SUMMARY

Detail-oriented Full Stack Web Developer Intern with experience in API integration and multiple programming languages. Develops applications using React, TypeScript, and Fastify to enhance functionality and user experience. Delivers high-quality code while improving system performance and efficiently solving problems to provide effective solutions.

EXPERIENCE

Full Stack Web Developer Intern — INSA

March 2026 - August 2026

Developed bill aggregation system using React and TypeScript for frontend, Fastify backend, and Postgres for database management, enhancing user experience and streamlining billing process.

- Developed secure login and authentication features to protect user data and privacy on web applications.
- Managed databases using SQL to store, retrieve, and manipulate data efficiently, ensuring data integrity.
- Designed and developed user-friendly website interfaces using HTML, CSS, and JavaScript for improved user engagement.

EDUCATION

Bachelor of Science | Software Engineering

2020

PROFESSIONAL STRENGTHS
